

PRODUCT USE GUIDE FOR BDS URINAL SURFACE CLEANER & DEODORISER

Product Description

An enzyme product which dispels the urine odours from surfaces e.g. floors, grouting, wall tiles and urinals. And prevents the build-up of uric acid scale. Ideal for use in and around urinal bowls, channel urinals and surrounding walls and floors. Leaves a refreshing vanilla fragrance.

Product Features

- An innovative, non-toxic, biodegradable combination of biological and chemical components designed to control odours and troublesome uric scale deposits in and around urinals.
- A highly effective blend of naturally occurring microbes and biodegradable surfactants. The microbes degrade the organic matter that smell-producing bacteria grow on. In addition, they convert the uric acid into soluble compounds, preventing build-up of insoluble organic deposits. The effects of the product are most apparent in low flush systems.

Direction for Use

- No dilution is necessary. Apply product with a trigger spray, liberally covering the surface to be cleaned and directing three final squirts into the drain hole. Leave for 30 minutes and then rinse area with clean water. Repeat for stubborn stains and agitate with a brush if necessary.
- Used daily, the product will maintain, clean and keep urinals free from odour and scale.
- Extremely cost-effective as there is no need to use disinfectant blocks or bleach.
- For floors, mop with a solution of 100ml in 5 litres tepid water in a bucket. Leave to dry.
- **At no time must any bleaches or biocidal products be used in conjunction with this product.**

Storage

- Store in cool conditions away from direct sources of heat
- Avoid extremes of temperature
- Do not allow to freeze
- Ensure the cap is tightly fitted after use
- Keep out of reach of children

Shelf Life

- Shelf life 24 months, if stored as recommended.
- Use within 6 months of opening.

Environmental Hazards

- Causes minimal environmental impact. The surfactants contained in this preparation are ultimately biodegradable and thus comply with the biodegradability criteria as laid down in Regulation (EC) No. 648/2004 on detergents.

Note: This product is only to be used for the purpose for which it was intended and in accordance with the specified instructions. This product should never be mixed with other chemical products and should be handled with care and stored carefully out of reach of children.
