

PRODUCT USAGE GUIDE MICRO CLEAN STAIN & ODOUR REMOVER

Product Description

Removes odours from urine, vomit and food spills. For use on carpets, upholstery and fabrics. May be used in carpet extraction machines. Concentrated formula 1L makes up to 20L of ready to use liquid.

Product Features

- A concentrated blend of biodegradable surfactants and naturally occurring micro-organisms which work together to achieve excellent general surface cleaning on both hard and soft surfaces.
- The bacteria in the product are specially selected to target the organic soiling traditional cleaners cannot remove.
- Can be used as a general cleaner and odour controller. The bacteria in the product release digestive enzymes that degrade the stain and odour causing materials, thereby eliminating the source of the problem. The natural enzymes used do not stain or harm fabrics or materials that are unaffected by water.
- This is a natural product. Its colour may vary and a small amount of sediment may be noticed. This is quite usual and does not affect the performance of the product.

Direction for Use

- Shake container before opening. The formulation is activated by diluting with water and should then be used within 3-4 hours after dilution. Excess solution can be used to clear sinks, urinals and toilets.
- For carpets and fabrics: dilute 1:1 with warm water, brush well into soiled area and leave to dry and vacuum. Cover area with damp cloth if it is likely to dry out in under 3-4 hours.
- For concrete, tiles: dilute 1:1 for heavy soiling. Mop on and remove excess moisture but allow to dry naturally. Dilute 1:20 (i.e. 5% or 40ml or 2 pelican pumps in 750ml) for more frequent use.
- Black mould etc. in grouting: Scrub in neat product and wipe clean with damp cloth.

Storage

- Store in cool conditions away from direct sources of heat
- Avoid extremes of temperature
- Do not allow to freeze
- Ensure the cap is tightly fitted after use
- Keep out of reach of children

Shelf Life

- Shelf life 24 months, if stored as recommended.
- Use within 6 months of opening.

Environmental

- This product is believed not to be dangerous to the environment with respect of mobility, persistency and degradability, bio accumulative potential, aquatic toxicity and other data relating to ecotoxicity. However, do not allow large quantities of neat product to enter surface waterways.
- None of the components of this product are animal derived.
